

F P Paper Handling

# 1001 Paper Folder

TECHNOLOGICALLY ADVANCED

The 1001 Paper Folder makes folding quick and easy. With little or no training, almost anyone can quickly set standard folds by simply matching the pictures on the two front dials.

With the 1001, you can automatically fold at a rate of 140 sheets per minute or manually feed up to three stapled or unstapled sheets. This machine will even handle gloss-coated, NCR, and carbonless stocks. The unique anti-static strip takes the stick-together problems out of using NCR or other carbonless paper. Just load the paper and go.

The 1001 will perform standard and customized folds on paper ranging from 5 3/4" W x 6" L to 8 1/2" W x 11" L and double parallel folds on legal-size paper. It's the only folder in its price range to reliably perform on any stock up to 60 lbs. The 1001 even self-adjusts for your paper. A special "retarder" in the feed system is pre-adjusted to put the right pressure on each page, virtually eliminating the problem of doubles or misses. You can also intermix your paper stock on the same run. Other features include a very small footprint, rugged 12 gauge steel construction for long wear, and fold tables that are fully enclosed to dampen operational sound.

Call your local FP dealer today and ask about the 1001.

At FP, we're constantly exploring new technologies to improve our mailing equipment so we can improve your mailing operations. It's part of what makes FP the right choice for your mailroom.
